

PRESSBOARD MATERIALS

Our custom manufactured pressboard folders provide all of the value-added advantages and capabilities of design, allowing us to meet individual and specific needs.

It is this kind of manufacturing and pricing flexibility that allows you to design a folder from scratch that meets your exact needs.

We strongly encourage you to custom design pressboard folders to best fit your filing system. It is always preferable to offer a better designed folder than to try and match office suppliers' stock folders.

We offer a variety of standard pressboard folder designs. When designing a custom pressboard folder, any specifications can be changed and/or combined with other features.

When faxing or mailing your orders, make sure to include exact specifications.

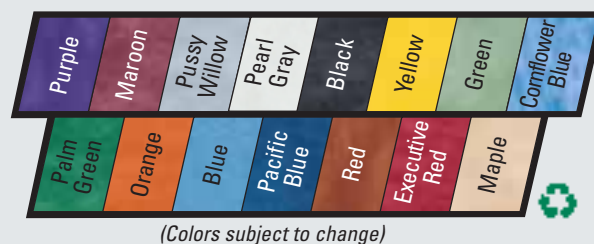

TYPE	FEATURES	CONSIDERATIONS
I Genuine Pressboard™ 	<ul style="list-style-type: none"> ▪ Available in 15 colors ▪ High density, premium quality 16 ply - thinner so it takes less shelf space ▪ Resists dirt and moisture ▪ Superior stiffness, strength and durability - to reduce fraying ▪ Recycled material 50-20-30 	<ul style="list-style-type: none"> ▪ Cost slightly more than the other two options
II Guidex® Pressboard 	<ul style="list-style-type: none"> ▪ Available in gray and red ▪ Medium density pressboard ▪ Less expensive than Type I ▪ Smooth, glossy in appearance ▪ Industry standard for commercial classification folders ▪ Recycled material 25-50-25 	<ul style="list-style-type: none"> ▪ Widely available as commodity products ▪ Takes 10" more of shelf space per 1,000 folders than Type I
III Valtex™ Pressboard 	<ul style="list-style-type: none"> ▪ Available in 7 colors ▪ Low density pressboard ▪ Economical alternative to Type II ▪ Recycled material 30-45-25 	<ul style="list-style-type: none"> ▪ Less durable than Type I and Type II ▪ Takes 10" more shelf space per 1,000 folders than Type I

Type I Genuine Pressboard™ and Type II Guidex® Pressboard are registered trademarks of  **FiberMark**

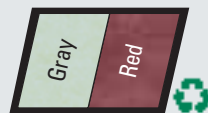

MATERIALS USED FOR PRESSBOARD FOLDERS

Type I Genuine Pressboard™ - is a durable recycled pulpboard pressed together to produce 20 pt. pressboard. It is one of the most durable materials in the industry for making filing products. Type I Genuine Pressboard is used for folders, classification folders and guides, and color coding files.

This material is recommended for long term filing that is kept and maintained for many years.

Type II Guidex® Pressboard - is a durable recycled pulpboard pressed together to produce 25 pt. pressboard. Made from low grade woods. Type II Guidex Pressboard is one of the most durable materials in the industry for filing products.

Type III Valtex™ Pressboard - is a relatively low grade 25 pt. recycled pressboard. It is an economical alternative to Type II Guidex Pressboard.

Type I Genuine Pressboard™ and Type II Guidex® Pressboard are registered trademarks of  **FiberMark**

Tyvek® - is extremely tear-resistant and has a superior shelf life. We use only Tyvek on pressboard folders.

This material is used to form the expansion (gusset) for pressboard folders. New Brown and Dove Gray Tyvek are stocked in the most popular expansion sizes. Colors listed below are available when purchased in minimum quantities. Colors are subject to change.

Printing methods do not allow for accurate color reproduction. Call your Sales Representative if you need a sample.
