

COMPUTER GENERATED STRIP LABELS

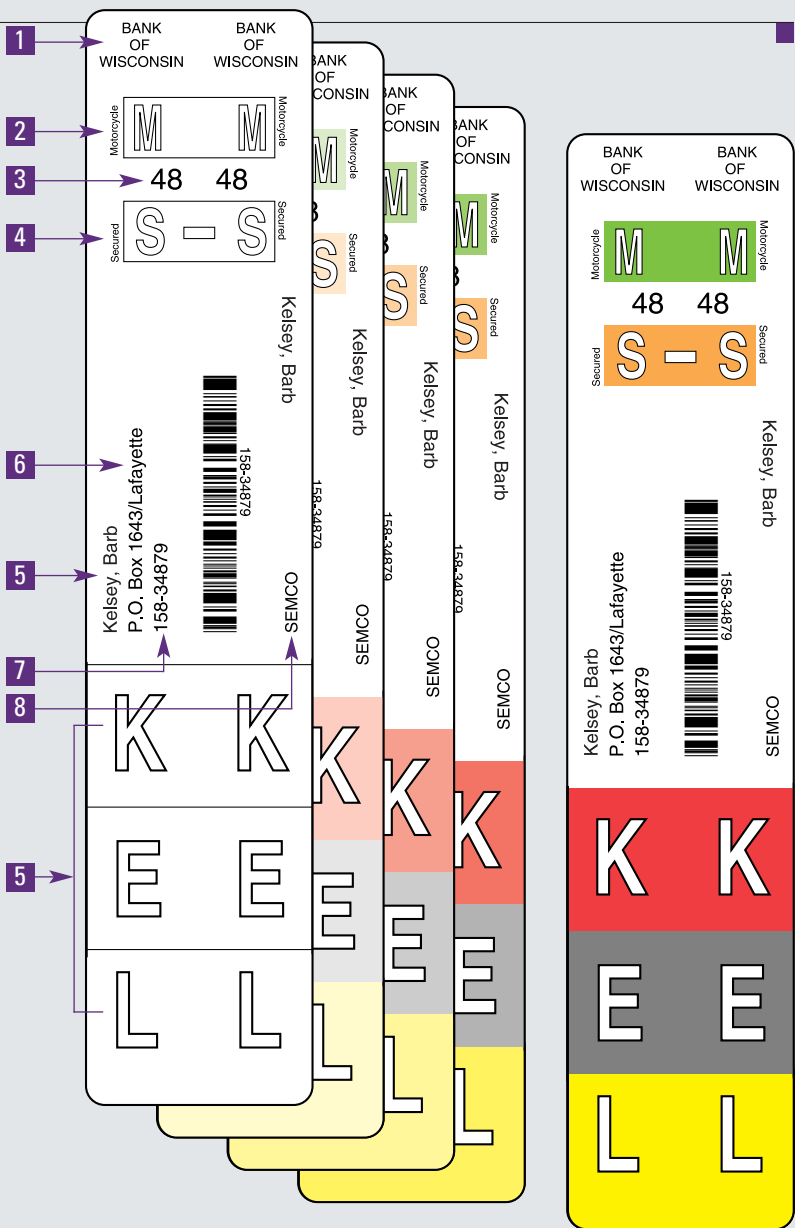

Our company offers a **Computer Generated Strip Label**. Very similar to a regular strip label, the computer generated label offers more features, such as a printed barcode, logo, year band and designator bar. With the array of brilliant colors you can match any existing system or create a new one. Have the labels printed in consecutive order, terminal digit order, or alphabetically. We can supply you with Computer Generated Strip Label folders ready to go right out of the box.

Each label has a clear film laminate over it, giving the label extra protection and strength. Strip labels are factory attached with a cold adhesive covering 100% of the label to assure that they will never fall off, even after years of use. The Computer Generated Strip Label is an easy way to incorporate pertinent information in a consistent spot on one easy to read strip label. Below is an example of how a simple label design turns into a finished label.

LABEL TEMPLATE

Data Format: Please specify all of the data/information you wish to incorporate on your customized label. Also indicate the sequence the information should appear.

- 1 Bank of Wisconsin - Constant
- 2 Account Type - Word on side, 1st letter color-coded. (10 charac. max.)
- 3 Number Code (2 charac.)
- 4 Account Sub. - Category - Word on side, 1st letter color-coded. (9 charac. max.)
- 5 Name - Last name first, 1st 3 letters color-coded, 1" tall, Barkley style, both sides of label (30 charac. max.)
- 6 Address - 1 side of label, (30 charac. max.)
- 7 Account Number - 9 characters, under address, barcode on right side, human readable characters over barcode.
- 8 SEMCO - Dealer name constant on each label.

## DESIGNING YOUR COMPUTER GENERATED STRIP LABEL

What you need for a computer generated label:

**1** Your Label Design - Please be as specific as possible. You will receive a design request form from your Sales Representative (See Example A). Draw on the blank label where you want items placed and on the left specify how you want the system to work. For example; in an alphabetical system you might state that the three letters being color coded are the first three letters in the last name. If you have any questions please contact your Sales Representative.

**2** When supplying a data disk of client information that is to be placed on the labels, please follow the specifications listed below.

- Data must be on a floppy disk, CD or electronic file.
- Data should be formatted and left-hand justified.
- There should only be one field per line.

Example:

John Smith  
123-45-6789  
(303) 555-1234

- Data must appear exactly as you wish it to look on the label, including punctuation and hyphens. The data will be printed as it appears.
- Barcode characters must be an acceptable ANSI code of 39 characters.

Contact your Sales Representative for a more detailed specification sheet.

**3** After these steps are complete, an actual sample will be made of your label for your approval (See Example B). At this time you can make any corrections, check the colors, fonts, and the scanned barcode. Once you have signed the approval the rest is up to us. It's that easy!

## STRIP LABELS

Factory applied strip labels are offered in a wide variety of styles to match almost any system. Strip labels are attached with a cold adhesive covering 100% of the label to assure that they will never fall off, even after years of use. A matte or glossy clear protective film laminate is added to every label. Additional styles and systems are also available.

**CODE-A-PRINT.COM**

Code-A-Print.com is a web-based label archive and print utility that gives you control of your label printing needs. You can access Code-A-Print.com over the Internet from any PC running Windows®98, XP, or NT with Internet Explorer 6.0 or greater.

The easy to use interface lets you log into your secure account and manage your label printing process. You can select label designs from an ever increasing library of stock labels or use your own custom-designed labels. You can enter or import your label data, and you can save and retrieve your data for later use. You can print your labels as needed on high-quality label stock using your own laser or inkjet printer.

Code-A-Print.com puts you in charge of your label printing from your own desktop. It lets you print and manage your label needs without investing in specialized label creation software. You don't need to worry about sensitive and confidential data leaving your computer. You can administer and control account access, yet you can have an unlimited number of users access your account from as many computers as you need.

**CODE-A-PRINT ON-DEMAND PRINT SOLUTIONS**

Code-A-Print is an on-demand label print system for the busy filing system looking for ways to improve quality and reduce costs. Labels are designed with any variety of colors, text and barcodes to produce consistent brilliant labels. We offer a basic print only version or a full design version for users who need to design labels. All systems are complete with a label design and 90 days unlimited phone support.

**FAST TRACK LABEL PRINT SERVICE**

SEMCO offers an expedited service for printing and assembly of full strip color code labels. The Fast Track service is ideal for quantities from 50 to 5,000 where getting the product fast is a key part of succeeding. We can print using any label design or make one for you. You simply email or mail a disk with the data and we print and assemble the labels. We can print labels and assemble to stock folders in 3-10 days after approval of label design (based on quantity).
